DETAILED ACTION***Allowable Subject Matter***

1. Claims 1-14 are allowed over the Prior Art of Record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims is the inclusion of the limitations of sample chamber for a centrifugal permeameter for testing permeant conductivity of a porous sample having a porous top member for mounting over a top face of a sample and supplying a permeant to the sample, the top being movable with the sample to maintain a radially outward permeant force on the sample as the sample is being spun in the centrifugal permeameter and a permeant supply for supplying the permeant to the porous top. The closest reasonable Prior Art reference is US 5,563,333 to Haines et al. which discloses a sample chamber for a centrifugal permeameter (see Fig. 1 below) having a solid top member (64) fastened (not movable with a sample) via threads (106).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fluery et al., Durand et al. and Barnaby all teach various aspects and elements of the claimed invention, such as a resilient inner sleeve and chambers for use in centrifugal permeameters.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fitzgerald whose telephone number is (571) 272-2843.
